

Recovery 24/08/19
Finder Haydn Thomas
Sapphire & Diamond Earring

Haydn

Pleased to say that after an hour and a half searching I was able to find the Owner's sapphire and diamond earring in their back garden/field today.

It took time and several passes of the field as it was small and gave a low iron-type signal that I would usually ignore - just goes to show.

Appreciation

I am writing to thank you for the amazing recovery made by Haydn at our house in August this year.

We had lost a valuable earring in the garden. It was small but with a beautiful sapphire in its centre; and surrounded by diamonds. In the long grass we had no chance of finding it by eye.

We rang on the off-chance someone might be able to help - and are so very grateful that one of your club members (Haydn) was able to come over at short notice. He took great care and was able to find the earring after more than 90 minutes of looing; despite there being many other small items of metal in the grass.

It's fantastic to know there's a group of people in the area who are happy and able to come out and help people find their lost valuables.

Thank you so much! **Harry and Danielle**
