Lost Wedding Ring

Steve living in Middlewich lost his wedding ring whilst clearing up leaves by hand on his property and dropping the leaves over the garden fence onto an open grass field.

He has spent 4 evenings looking for the ring before he contacted the society's website under free recovery service.

The only access to the field was by removing the fencing panel from the rear garden which took around 10 minutes to remove.

The grass area had been cut and heavily trodden over whilst Steve was searching for the ring.

Within 20 seconds the undamaged ring was detected much to the delight of us both. 😊
